## STARTER BUNDLE

# Tappio — All 3 in One Guide

Three iPhone apps for three different problems. Here's how to use each one effectively.

## Spy Camera Finder

**When to use:** Every time you check into a hotel or Airbnb. Once at home as a baseline scan.

**How long:** 12 seconds per scan.

**Key feature:** 4 detection methods at once (Wi-Fi + Bluetooth + Magnetic + Infrared).

**Free tier:** Includes daily scans. Premium = unlimited.

**App Store:** [apps.apple.com/us/app/id6760315795](https://apps.apple.com/us/app/id6760315795)

## Brainova

**When to use:** 10 minutes a day, same time every day. Morning works best for most people.

**How long:** 10 min per session.

**Key feature:** Adaptive difficulty + Brain Score tracking across Memory, Math, Attention, Logic.

**Free tier:** Daily sessions. Premium = unlimited + advanced challenges.

**App Store:** [apps.apple.com/us/app/id6759396840](https://apps.apple.com/us/app/id6759396840)

## 3D Tape Measure

**When to use:** Before any furniture purchase. Before any renovation quote. When you need a measurement and no tape.

**How long:** Seconds per measurement.

**Key feature:** 3 modes (Line, Rectangle, Polygon) + LiDAR support on Pro models + PDF export.

**Free tier:** Core measurement. Premium = unlimited saves + PDF export.

**App Store:** [apps.apple.com/us/app/id6755061647](https://apps.apple.com/us/app/id6755061647)

WHICH APP FIRST?

## A quick decision tree

### Do you travel? (Airbnb, hotels, business trips)

→ Install **Spy Camera Finder** first. Use on arrival.

### Do you work from home or feel scattered?

→ Install **Brainova**. 10 minutes a day fixes attention faster than any productivity hack.

### Are you renovating, moving, or buying furniture this year?

→ Install **3D Tape Measure**. Pays back the first time you avoid a wrong-size return.

### All three apply?

→ Install all three. They handle different parts of your life — no overlap.

### Common patterns from real users

- **Travelers** tend to start with Spy → add Brainova for long flights → eventually use Tape for home setup.
- **Remote workers** start with Brainova → use Tape to optimise desk and home office.
- **Homeowners** usually start with Tape → add Brainova → use Spy for occasional travel.
